

## Visit to the Ideas to Impacts

Date: 12/11/2022

A field trip was arranged for all the students of Class XI to “Ideas to Impacts” a center for Entrepreneurship. The purpose of this visit was to develop entrepreneurial skills. On 1<sup>st</sup> November teachers of Secondary and Senior Secondary domain had also visited the center.

The students were briefed about the various programs like I4C, Smart School Hackathons, the incubation center to name a few. Founder Mr. Geerendra Kasmalkar addressed the students about being an entrepreneur. He emphasised that entrepreneurship is not limited to Commerce subjects only. He stressed that most of their start-ups were tech start-ups started by engineers.

His address was focussed on three pertinent questions in the mind of every student. Viz.

- a. Where are the opportunities?
- b. How do you create opportunities?
- c. What are you doing about the opportunities?

He had an interactive and inspiring discussion with the students revolving around these questions. He talked about ‘Gig Economy’ and how it is going to be the work pattern for the future. He answered students queries and invited the students to attend the Pitching program that is held every Saturday at the Center.
