

Title: Grade V Students Shine in Creative Learning Showcase: Rhapsody Rock

Grade V students wowed their peers and teachers with a fun and engaging activity - Rhapsody Rocks, a dynamic showcase of science and math knowledge. Through poems, riddles, jokes, fun facts, and quizzes, they explored difficult concept of science – Skeleton. While songs brought math and science concepts like fractions, decimals, solar system, and gravity to life. This creative approach at TOS not only deepens learning and understanding of complex subjects but also showcases students' talents and makes learning fun and memorable. Rhapsody Rocks activity demonstrates the power of creative expression in education, empowering students to engage with academic content in innovative ways.
