

## **Title: Nurturing Responsible Citizens: A Field Trip Adventure for Grade I Students to Supermarket**

In the pursuit of shaping responsible future citizens, educational institutions are continuously seeking innovative ways to enrich the learning experiences of their students. Recently, The Orchid School (TOS) took a significant step towards this goal by organizing a field trip to supermarket for its Grade I students. This excursion not only offered an opportunity for hands-on learning but also fostered experiential understanding beyond the confines of the classroom.

The primary objective of the field trip was to provide students with a practical understanding of mathematical concepts and vocabulary in real-world settings. By immersing themselves in a local supermarket, students were able to witness firsthand the application of mathematical principles in everyday transactions.

Moreover, the excursion served as a platform for students to develop essential communication skills. Interacting with store staff boosted their confidence required for striking a communication. One of the highlights of the trip was the emphasis on healthy food choices. Through guided exploration, students were introduced to different food groups and encouraged to make informed decisions about their dietary habits.

The role of teachers during the field trip was pivotal. They acted as facilitators, guiding students through various learning experiences and encouraging active participation. By fostering a supportive environment, teachers ensured that each student had the opportunity to maximize their learning potential. Overall, the Grade I field trip to supermarket provided students with a memorable learning experience and equipped them with essential life skills.
