

## **Grade II students learning Road Safety through field trip: An enhanced experiential learning activity.**

In an attempt to bridge the gap between textbook learning and hands-on experience TOS recently took their Grade II students on a field trip to Children's Traffic Park, Pune. This field trip served as an invaluable tool to bridge the gap between classroom learning and real-world application.

In our ongoing endeavor to provide comprehensive education, we recognize the importance of equipping students with essential life skills, including knowledge about road safety. The primary objective of this excursion is to provide students with firsthand experience and understanding of traffic rules and safety measures on the road. With this activity students engaged with various aspects of road safety, including identifying road signs, understanding pedestrian crossings, and practicing responsible behavior.

At the Children's Traffic Park, students had the opportunity to apply theoretical knowledge gained in the classroom to real-world situations. They navigated through miniature streets, encountering traffic signals, zebra crossings, and intersections, thus gaining practical insights into the importance of following road rules and regulations.

In conclusion, field trip to the children's traffic park offered invaluable opportunity to our Grade II students for experiential learning. This field trip ignited curiosity, fostered engagement, and deepened understanding of students to connect theoretical concepts with practical scenarios.
