

A Special Experience

This experience was a really special one.

Hosting!!!!!! The best way to get new friends and have one more person in the family. I never treated my guest like a guest but always like a member of my family. We visited temples such as the Iskon temple, Jain temple. He was also very keen to shop in India so we visited many places where he could shop. He also tried out a lot of things related to Indian tradition. He tried many Indian dishes. He wore Indian clothes and enjoyed it all. I enjoyed helping him visit places in Pune and know about its culture.

Apart from the tradition and culture he found the climatic conditions and the school different from Sweden. He saw that here the rains were much heavier and the school population was much more over here. He also appreciated how people in India encourage friendship and love to talk with each other. Hence, as a whole hosting was really a good experience and I would always be looking to grab opportunities like these.
