

## **REPORT ON SWEDEN- WABLEWADI-TOS COLLABORATION PROJECT DAY 2**

Today was the second day of our workshop with the Swedish teachers and students. All of us were first divided into four groups to work on different tasks. Two groups were supposed to walk around the school and take interviews of certain people and some shots of the school environment. The other two groups were going to learn about stop motion animation.

I was part of the group which did stop motion animation. The Swedish mentor, Ms Nina Larsson, first gave us a general idea about stop motion animation like, where it is used, how it's made and its importance. And then she taught us how the app called 'Stop Motion Studio' worked and helped us with its settings. After she was done briefing, she gave us a task to make an animation video on how you see Pune 30 years from now. My group immediately started working on it with a lot of enthusiasm and creative ideas. In about 2 hours we were done with our task after which, we took a lunch break.

When we were done with the hearty lunch we came back to evaluate our tasks and had a discussion on the improvements that could be made.

Soon after the evaluation the mentors along with the groups planned the projects and interviews that were going to take place in Wablewadi, the very next day.

At the end of the day, around 4 pm the workshop was over and the Swedish students moved in with the host families.

This workshop was thoroughly enjoyed by everybody especially because of the hands-on activities and proved to be a great learning experience for all.

Regards,

Mythili
