

THE ORCHID SCHOOL

## Continuous In-Service Training

Every organization has a set of objectives & goals, and they can achieve it effectively only if its 'Human Resource' is trained periodically and channelized in the right direction. Training is an organized activity which is undertaken to transform or upgrade an individual according to the organization's functional needs.

Our School believes that all the teachers are also learners in a way. Only if a teacher keeps abreast with the latest updates in his/her field, will he/she be able to impart this knowledge to his/her students. Hence we periodically arrange for teacher training programs in the school on a wide variety of topics. We also send them for relevant external training programs and workshops which may be need based.

Teachers implement the various techniques and strategies in the classroom which enriches the teaching learning process.

After successful completion of the training program a feedback is taken in the form of a structured questionnaire so as to know whether the Time, Efforts & Money invested on training has turned into a good investment.
