

Sweden Exchange Program

Greetings!

Once again our students travelled to Sweden to make the most of this opportunity to experience the culture, ideologies, life style and realities of the world outside India and once again our belief in the significance of travelling together was reaffirmed. Away from home, with their peers and teacher, they learn some crucial life lessons which cannot be taught or learnt in the confines of the academic realities in a school environment. Same was very evident from the experiences they shared after the completion of this exchange program.

The students realise that every culture has values and traditions, which need to be respected. Some times we tend to misapprehend the beliefs and perspectives of people from other culture and such exchange programme makes us to admire those opinions and outlook. We not only start to value the treasure we have in form of our rich culture and heritage but also learn to respect the practices followed in the other side of the globe.

These opportunities to travel away from home, teach the students to be accountable and responsible for their own safety and well-being. It widens the scope of learning and better their perception about travel. These travel opportunities and interaction with students of other country make them open minded and accepting; sensitive and empathetic towards others. This also helps them to deal with their own anxieties and fears and makes them confident and self reliant.

Apart from learning significant life lessons, students have fun and frolic. They make friends for life and create some very loving memories to be cherished even years after.

Wish to create many more learning opportunities for our students!

Namrata Majhail
