

On 26th November, the students of grade XII Commerce visited a carpet manufacturing industry. They got to see the complete production process of carpet making. They saw how the raw material passes through various production processes, the huge machines like carding willow, winding machine, weaving machine, dyeing machine and the weaving machine. The used-up water is processed and used for the garden. CSR activities done by the company were also explained to the students. It was a great learning experience for the students.
