

In the context of the dynamic 21st century, we are increasingly recognizing that History shapes us, rather than us shaping it. Understanding our past, origins, and culture is akin to the roots of a tree. The History Club at The Orchid School, in partnership with the Quantum Foundation, aims to expand our historical knowledge beyond textbooks. They have developed a diverse set of activities for students across different academic levels.

On October 12, 2023, the inaugural session of the History Club featured Dr. Pratik P. Surana, the founder of the Quantum Group, who is a highly qualified international trainer and life coach with over 22 years of industry experience. The session commenced with welcoming remarks from the club's leaders, Aananya Anand and Agrima Tiwari. Dr. Surana shared captivating historical anecdotes that emphasized the impact of history on our identities and values. He connected the origins of Badminton, Abraham Lincoln, and Pav bhaji and celebrated the remarkable story of Biju Patnaik.

The session concluded with the school's Principal, Sangeeta di, sharing her changed perspective on History. Importantly, the event left a significant impact on the attending students, inspiring a shift in their attitudes toward History. This change instilled the belief that The Orchid School's History Club is set to lead the way in making History a subject to be absorbed, not just taught.
