

Jui Keskar - Forbes India 30 Under 30: The ones we couldn't ignore

These achievers across our 20 categories missed the list by a whisker but their achievements are hard to ignore. Take a look at the 'special mentions' of Forbes India 30 Under 30 2023.

Health Care

Jui Keskar | 16

Founder, editor, Beat the Tremor Foundation

Jui Keskar has developed JTremor-3D, a wearable device that enables tracking of tremors in a person's body. That data is stored in a cloud database and shared with doctors who can then decide on the course of medication. The profiling device is embedded with sensors, accelerometers and gyro meters. Keskar had developed the device during the nationwide lockdown in 2020, after seeing her uncle who had been suffering from tremors. In 2022, she won the Pradhan Mantri Rashtriya Bal Puraskar (2022) for Innovation.

Incidentally, Jui has also received the Grand award at a National level competition this year as well at IRIS. She will be representing India at Regeneron International Science and Engineering Fair 2023 in Dallas, Texas, USA in May later this year. Measuring disease progression for Parkinson's ,she has now built sensors for measuring stiffness/slowness, gait change and speech distortion.

Extremely proud moment for TOS !
