

Math day

On 22nd December 2023, The Orchid School students of grade I to grade IV paid tribute to the greatest mathematician Srinivasa Ramanujan on his birth anniversary by indulging in numerous activities centred around numbers, patterns, shapes, and quizzes.

Grade I students engaged in a hands-on 3D model of various geometric shapes making activity using straws and connectors thereby developing and stimulating children's imagination, construction skills, and problem-solving abilities.

For Math Day celebration, grade II students engaged in a hands-on tangram activity working in pairs. They explored geometric concepts by utilizing tangram pieces to form diverse shapes, fostering spatial awareness and problem-solving skills in an interactive learning environment.

Grade III celebrated the day by integrating Math with shapes, music and dance, rhythm, and board game on Multiplication. They added a sweet touch to the celebration by indulging in eating and sharing a piece of cake with their fellow classmates.

Grade 4 students showcased their mathematical prowess in a special assembly where they featured engaging math facts. In an exciting twist, mathematical quizzes were asked through grade I to grade IV. Students also organized two levels of brain teasers to all the participating grades. Six outstanding students, two from each class, earned their spot in the first round. The intensity escalated in the second round, where two brilliant minds emerged victorious. Certificates were awarded to these adept problem solvers, making Math Day a celebration of knowledge, teamwork, and mathematical excellence.
