

## MATH AND LANGUAGE WORKSHOP FOR PARENTS OF PRE-PRIMARY SECTION

Parents are the first and ongoing educators of their children and, as such, should receive information and support to help develop their child's learning. At The Orchid School we are open to the involvement of parents in the work we do and we provide information that helps parents engage with school and their children's education. The language English and Math workshop for Pre-primary parents was an initiative for this purpose.

For some parents the prospect of helping with their children's schoolwork is often daunting. The English and Math workshop was designed to provide parents with information and ideas about how to help their child at home with homework and other curriculum-related activities. During the workshop parents were shown the same English and Math strategies as their children are taught in the class.

This hands on; fun filled workshop was a huge success with parents. The team demonstrated how language can be learnt through activities like show and tell, picture talk, experience story, story reading and music every day. Blends, sight word method and walking talking words of reading were explained in details. Parents had fun participating and learning. At the same time their valid questions were answered and doubts clarified.

**Upcoming is the Hindi workshop.** It is our pleasure to invite Pre-Primary parents for the same. I hope parents pour in in large numbers and continue the legacy of partnering with the school. Let's help our little ones learn and enjoy!

**Team Pre-Primary.**
