

Accolades at Teachers Got Talent 2023

Teachers Got Talent 2023: EduDrone – WE CONNECT

On the 15th January 2023, four teachers from our Primary, Middle and Secondary domains participated in the event where the theme was: **Experiential Learning- Mapped with NEP and NCF.**

The expectation from the schools was that participants would submit an abstract paper presentation that would be released as an E-SOUVENIR during the conference. It needed to be linked with any UNESCO SDG goals.

The topics selected and presented were: Snehal Welde on 'Chefs At Work' , 'Learning Fair' by Pallabi Mohapatra , Parag Tambe on 'Khushi Ka Bazaar' and 'Formula for Cone and Sphere' by Nikhil Pujari.

Accolades for our school and a proud moment as Pallabi Mohapatra received the 'most engaging paper 'certificate whereas Snehal Welde secured the 1st position 'Rising Star' for the Primary stage.

The opportunity provided by the school for displaying our unique concepts on the big stage always helps our high performing teachers to get more motivated and committed to the cause of being excellent facilitators of education.

It is through these channels that we can promote our concepts to encourage other schools and guide them to build a more hands on & holistic model of learning.
