

A 2 Day Entrepreneurial Bootcamp at TOS

The Orchid School is dedicated to preparing students for the future. Recently, TOS organized a skill development bootcamp called "Building an Entrepreneurial Mindset" in collaboration with Let's Enterprise. This two-day bootcamp aimed at enhancing skills by teaching students to identify problems, develop unique solutions, deliver a confident business pitch, and build self-awareness. By broadening students' understanding of problem-solving with an entrepreneurial mindset, the bootcamp empowers students to become future-ready leaders who can unleash their full potential. The focus of the bootcamp was to cultivate mental agility among students and highlight its significance in navigating uncertainty to achieve personal goals.
